EDUCATION

Lakshmi Narain College of Technology Excellence
Bachelor of Technology
Computer Science Engineering
Cumulative GPA: 8.74

Bhopal, MP
2020- 2024

EXPERIENCE

Tata Consultancy Services Ltd. (TCS) – Salesforce QA/ Developer

Aug 2024 – Present

- Designed and developed solutions using Apex, Lightning Web Components (LWC), and Flows to enhance system functionality.
- Performed functional, regression, and UAT testing, ensuring system quality and compliance with requirements.
- Conducted debugging and issue resolution for Salesforce components to improve performance and maintainability.
- Collaborated with cross-functional teams in an Agile environment to deliver high-quality Salesforce features.

SmartInternz –

Salesforce Developer Internship

- Completed hands-on training on **Salesforce Platform fundamentals**, including data modeling, security, automation, and UI customization.
- Built Salesforce applications using **custom objects, relationships, validation rules, flows, and Apex basics**.
- Gained practical exposure to **Service Cloud features**, reports, dashboards, and Salesforce best practices.
- Worked on guided projects aligned with real-world CRM business scenarios.

Infosys

Springboard Internship 4.0

March 2024 - June 2024

- Developed and deployed an Event Management System using the Django framework and Python, gaining hands-on experience in web development and backend engineering.
- Gained practical exposure to Agile development practices, version control (Git/GitHub), and debugging techniques.
- Adapted to cross-cultural collaboration, making it an enriching and engaging learning experience.

PROJECTS

Salesforce Service Request & Technician Assignment System

June 2024

- Designed a Salesforce application to manage Service Requests, Service Line Items, Technicians, and Appointments.
- Automated creation of Service Line Items based on selected services using record-triggered Flows.
- Implemented technician auto-assignment logic based on specialization and workload balancing.
- Built approval processes for service pricing and ensured data integrity using validation rules.
- Enhanced operational efficiency by reducing manual assignment and improving service turnaround time.

SKILLS

Salesforce Development: Apex, SOQL, LWC, Lightning Flows, Process Builder

QA & Testing: Test Case Design, Regression Testing, UAT, Debugging, Issue Resolution

Web & Backend: Python, Django, HTML, CSS, Bootstrap 5, Tailwind CSS

Databases: MySQL, SQLite, MongoDB

Tools: Git/GitHub, Postman, Workbench, VS Code

Cloud Services: AWS S3, EC2

ACHIEVEMENTS

- Received multiple individual and team recognitions, including **Star of the Month** and **TCS Xcelerate Champion**, for outstanding performance and contribution.
- Actively participated in various **Salesforce events** conducted by **TCS** and **Salesforce**, gaining exposure to industry best practices and emerging technologies.
- Successfully completed the Hacktoberfest 2023, promoting collaborative coding practices and open-source contributions.
- Demonstrated proficiency in Data Structures, Algorithms, and SQL with over 250 LeetCode questions solved.
